UX Designer | B2B/B2C SaaS | System Thinking | Dependable Under Pressure | Data-Driven Decision Maker

EDUCATION

Cornell University | Master of Information Science

Dec 2025

Oberlin College | Bachelor of Computer Science & East Asian Studies

Jun 2024

EXPERIENCE

Vicino AI | Product Designer

New York, NY (Remote) | Dec 2025 – Present

B2B | Web App | Generative Video | Node-based workflows

- Led **0–1 and iterative design** on a **node-based generative video creation web app** that helps creators move from generation to editing to delivery with lower prompt friction, featuring **Video Editor**, **TextNode agent sidebar**, **3D Node workflows**, and cross-modal iteration mechanics.
- Designed **user flows and information architecture** with an emphasis on **inclusive design principles** for the prompt-translation UI, supported by **rapid prototyping** and **data-driven decisions** grounded in model constraints.
- Drove product clarity through **problem framing** and **business requirements gathering**; identified usability gaps via **UX audits and heuristic evaluations**, prioritized issues using **pain-point mapping**, and translated findings into design principles.
- Executed **hi-fi designs** with **feasibility assessments** and sprint planning; delivered **UI specs, redlines, and annotations**, and provided **QA support** to stabilize multi-version workflows.
- Leveraged **AI-assisted vibe-coding (Cursor, Claude, V0)** to rapidly build **frontend prototypes and interactive demos**, accelerating design-to-dev handoff cycles and enabling faster stakeholder validation of complex node-based UI patterns.

Smarttwigs | Product Designer

New York, NY | Dec 2025 – Present

Marketplace | Web App | Fashion resale & Auction

- Led the **0–1 design** of a fashion resale web marketplace featuring **onboarding, marketplace + auction experiences, SEO/policy pages**, and a **reusable component system** that helps sellers list with stronger storytelling and buyers browse, bid, and purchase with confidence.
- Defined **roadmap** and aligned **success metrics with KPIs**; conducted **competitive analysis** and UX trend research; produced **wireframes with content design, responsive design, and micro-interaction design**. Built a **component library and design system** with style guide and design tokens.
- Applied **AI vibe-coding workflows (Cursor, Claude)** to scaffold **responsive frontend components** and iterate on UI variants at speed, bridging design and engineering to shorten the build-test-ship cycle.

Google – UX/UR with Gen AI | PM & UX Designer

Ithaca, NY | Sep – Dec 2025

Cloud Service | Generative AI | User Research

- Coordinated a **6-member team** with **Google UX/UR leads**, setting agendas, tracking deliverables, and facilitating weekly syncs; developed **project plan and work breakdown** aligned with client milestones.
- Conducted **user research planning** including **survey design and interview protocols**; produced **low-fidelity prototypes and interaction flows**, iterated with design critiques from both teams, and presented progress updates.

Froghire.ai | UX Designer Intern

New York City, NY | Jun – Aug 2025

B2B & B2C SaaS | AI & Job Management Platform | Data-intense | Chrome Extension

- Redesign and launched a B2C/B2B job management web app and Chrome extension with **100,000+ users**, introducing onboarding, user education, email templates, and automated reminders; achieved **4.9/5 rating** on the Chrome Web Store.
- Gathered **business requirements** and conducted **competitive analysis** of IA, UX trends, and layouts; **analyzed data** to uncover **user pain points**; conducted **UX audits and heuristic evaluations**, **rapidly prototyped** concepts, and presented with **storytelling** to gain stakeholder buy-in.
- Established a **design system using Atomic Design** (fonts, component library, design tokens), delivered **dev-ready handoffs** with UI specs, redlines, and annotations through **Agile collaboration**, and supported **QA** before launch.

Roper Research Center | UX Designer

Ithaca, NY | Sep – Dec 2024

Digital Archive Platform | Educational Game Website | Design System

- Redesign UI/UX of an online history game WebApp (**27,000+ datasets, 850,000+ questions**); led **user interviews, surveys, and usability testing** with **30+ participants**; synthesized insights into prioritized pain points; conducted **competitive analysis**.
- Conducted **UX audit** documenting **20+ usability issues** based on **Nielsen's 10 heuristics**; created **lo-fi wireframes** and **rapidly prototyped**; built a **design system** (color, typography, components, icons); acted as PM and **mentored designers**.

SKILL

Hard Skill: Python, Java, C, R, SQL, HTML/CSS/JavaScript, D3.js, Git/GitHub, Figma, Framer, Adobe Creative Suite, Canva, Unity, Microsoft Office, Advanced Excel

AI & Tools: Cursor, Claude, ChatGPT, V0, Midjourney, Stable Diffusion, ComfyUI, AI Agent Workflows, Prompt Engineering

Language: Native Chinese, Advanced English and Japanese
